PROFESSIONAL SUMMARY

Customer Operations & AI Evaluation Specialist with **5+ years** of high-volume support experience across aviation, telecom, logistics, and remote service environments. Delivers consistent results above QA standards, SLA targets, and documentation accuracy benchmarks — across **25,000+ documented interactions**.

Equally strong in **AI content evaluation, intent classification, data annotation, QA calibration**, and delivering actionable feedback that improves model performance. Brings the rare combination of operational depth and structured thinking that separates useful training data from technically correct but ultimately noisy data.

C2 English proficiency. Fully remote since 2020. Proven cross-functional collaborator in independent, async-first environments.

CORE COMPETENCIES

Customer Operations

QA Calibration
Adjudication Workflows

Documentation

Structured Templates
PII Protocols
Process Standardization
CRM Optimization

PROFESSIONAL EXPERIENCE

Operations & Administrative Manager

Lueri International — Delivery Logistics

Dec 2023 – Present · Remote

- Designed and implemented **structured 6-field documentation templates** for the 10 most common interaction types — cutting average resolution time by **~30%** and eliminating handoff inconsistencies.
- Standardised CRM note-taking and escalation protocols, improving operational visibility and team collaboration across a fully remote environment.
- Conducted QA reviews and workflow audits to maintain high service quality across **60–120 daily interactions**.
- Analysed interaction data to identify recurring escalation patterns; compiled findings adopted as team-wide process improvements.
- Upheld strict **PII separation standards** — reference IDs in open fields, sensitivity tags on flagged cases, zero data exposure incidents.

Stock Analyst

818 Pharmaceuticals

Apr 2025 – Feb 2026 · Hybrid

Concurrent with Lueri International

- Monitored and analysed pharmaceutical stock levels to ensure accurate inventory records and prevent supply shortages across on-site and remote operations.
- Maintained structured documentation of stock movements, reconciliation reports, and audit trails — **zero discrepancy incidents** on personally managed records.
- Identified stock irregularities through data analysis and flagged discrepancies for immediate resolution, improving overall inventory accuracy.
- Generated regular inventory and procurement reports for management — delivering **clear, actionable data** to support supply chain decisions.
- Coordinated with suppliers and internal teams to maintain optimal stock levels and minimise operational disruption.
- Upheld strict compliance and confidentiality standards handling sensitive pharmaceutical inventory and supplier data.

Customer Service & Sales Representative

Spirit Airlines — Aviation

Feb 2021 – Oct 2023 · On-site via CCI Kenya

- ▶ Handled **80–120 daily interactions** across phone, email, and chat — consistently above QA benchmarks and SLA targets (2-hour first response, 24-hour resolution).
- ▶ Utilised CRM macros, structured templates, and validation rules to produce audit-ready records with zero compliance escalations.
- ▶ Participated in QA calibration sessions, contributing to alignment between CSAT scores and documentation quality standards.
- ▶ Trained and onboarded new agents on CRM systems, QA expectations, and escalation procedures — measurably reducing ramp-up time.
- ▶ Applied advanced de-escalation and service recovery frameworks to resolve high-emotion situations with positive outcomes.

Customer Service & Sales Representative

Altice USA — Telecom

Aug 2020 – Feb 2021 · On-site via CCI Kenya

- ▶ Managed inbound and outbound interactions in a KPI-driven remote environment — maintaining accuracy across CSAT, resolution rate, and documentation quality benchmarks.
- ▶ Applied retention-focused resolution strategies and CRM best practices, reducing customer churn while maintaining data integrity.

IT Technician

Deckma Enterprises

Jul 2015 – Jun 2018 · On-site

- ▶ Delivered structured technical support with detailed documentation of issues and resolution pathways — early data governance discipline.
- ▶ Maintained service records with strict separation of technical data and user-identifiable information.

KEY ACHIEVEMENTS

- **~30% reduction in average handling time** at Lueri International through structured 6-field note templates — directly improving team throughput and SLA compliance.
- **25,000+ customer interactions documented** across 5+ years — a body of structured data representing real-world intent patterns, edge cases, and escalation pathways.
- Contributed to **QA calibration initiatives at Spirit Airlines** — helped align documentation quality with CSAT metrics and reduced inter-reviewer variance.
- **Trained and onboarded multiple support agents** on CRM workflows, QA standards, and escalation handling — reducing average ramp-up time and improving first-week documentation quality.
- Maintained **above-target performance during high-disruption periods** at Spirit Airlines — zero SLA breach escalations on personally managed interactions during peak operational crises.
